

## RSU to Promatic Adaptor Cable

iPull Remote Switching Unit (RSU) comes standard with cables having molded NEMA 5-15P plugs (a three prong standard wall plug). While it is possible to cut the plug and replace it with a Promatic Plug, it is recommended to use an adaptor cable having a standard socket, connected via short cable to a Promatic Plug.

Follow table and picture below to prepare adaptor cable:

Wire Color	Standard Socket	Promatic Plug	Function
Black or Brown	Hot	N	- 12V (GND)
White or Blue	Neutral	L	Throw switch
Green	Earth (center)	Earth (Center)	+12V (Power Supply)
