

# Voice Release Connection Instructions for Briley Smart Card or Token Box System.

The below information is for boxes wired only for Trap . Do not use this detail for skeet and trap overlaid fields.

The two wire cord that come from the Canterbury voice relay box (mounted inside the trap house) should be connected to these two terminals. In the absence of a voice release system , simple hook up your pull cord wires to these connectors.

The two wire cord that is connected to the ATA trap control (releases wires) should be connected to these two terminals.
